Re: Request for comment on recent work completed.

I am very satisfied with the finished product. Extra personnel were brought in to complete the masonry work within the estimated time frame. Although the final cleanup was delayed a few days due to other commitments, to be expected. Final cost was as estimated. Work started on time despite an impact with a deer while in route to the job site. All personnel were attentive to comments and suggestions made by the owner. Materials were scheduled to arrive when needed. The finished product considerably enhances the appearance of the house (at 210 Lodgepole Rd.) and will add much to the value of the property with time.

Best wishes
